Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest an estimating circuit and its corresponding method of estimating channel coefficients in a multi-carrier transmit diversity system in accordance with a block coding scheme comprising determining from a receive signal for each channel **estimated channel coefficients comprising artificially introduced interference components from adjacent channels**; deriving estimates for the interference components; and **determining interference-compensated estimates for the channel coefficients on the basis of the estimates for the interference terms** as cited in claims 1 and 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Knutson et al., Barany et al., Taura et al., Kremm et al., and Arslan et al. (PTO-892 attached) disclose systems and apparatuses related to estimation channel coefficients with different approaches.
